Yes. You can design **one website that serves three major customer types** without making the website confusing.

The key is to make the **homepage simple**, then let customers choose the path that fits them.

JREAL VISION — ONE PLATFORM, 3 CUSTOMER TYPES

Homepage

At the top:

JREAL VISION
Create • Print • Brand • Promote

Then:

What are you looking for?

[🛍️ Personal Shopping]
[🏢 Business Solutions]
[🤝 NGO & Organization Solutions]

This is the most important part.

---

1. 🛍️ PERSONAL / B2C

For individuals.

Examples:

- T-shirts
- Mugs
- Birthday banners
- Invitations
- Business cards
- Posters
- Photo printing
- Custom gifts

Customer journey:

Shop → Choose product → Customize → Cart → Pay → Delivery

They don't need to see complicated business features.

---

2. 🏢 BUSINESS / B2B

For companies, restaurants, shops, schools, hotels, etc.

Create a dedicated page:

BUSINESS SOLUTIONS

Everything your business needs to look professional and reach more customers.

Services:

Branding

- Logo
- Brand identity
- Signage
- Office branding

Printing

- Business cards
- Brochures
- Menus
- Banners
- Packaging
- Promotional materials

Marketing

- Social media
- Advertising
- Content creation

Media

- Product photography
- Promotional videos
- Reels

Business CTA

[Start a Business Project]

Then the customer can select multiple services.

For example:

Restaurant wants:
Logo + menu + T-shirts + photography + video + social media.

Instead of making six separate orders, they create:

PROJECT: ABC RESTAURANT BRANDING

---

3. 🤝 NGO / ORGANIZATION

Give NGOs their own landing page.

NGO & ORGANIZATION SOLUTIONS

Supporting organizations with creative, printing, media and campaign solutions.

Services:

- Project reports
- Training manuals
- Brochures
- Posters
- Banners
- Campaign materials
- Event branding
- Photography
- Documentary videos
- Awareness campaigns
- Digital marketing
- Publications

And most importantly:

REQUEST AN NGO QUOTE

They can upload:

- Terms of Reference
- RFQ
- BOQ
- Specifications
- Artwork
- Project requirements

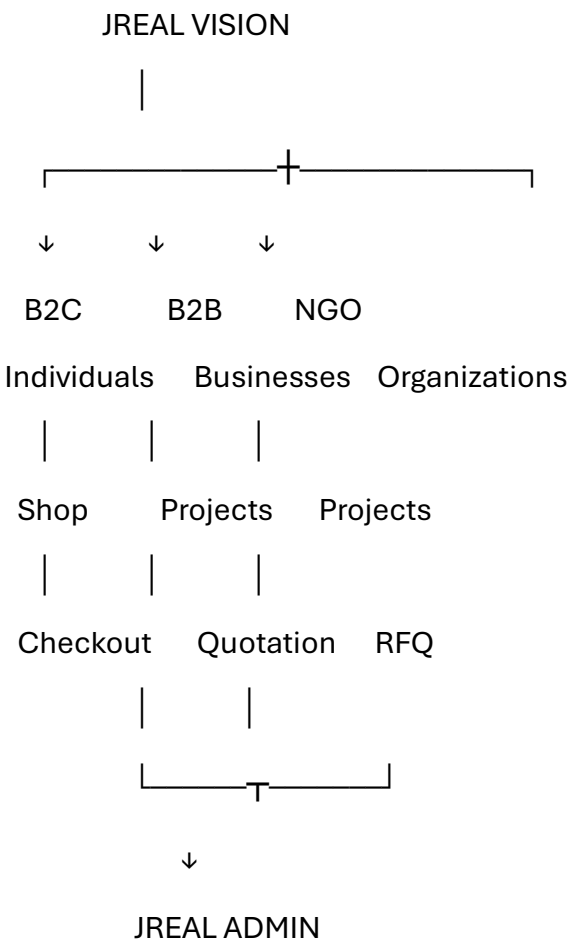

Then JREAL reviews everything and prepares a quotation/proposal.

The website should NOT look like 3 separate websites

This is important.

You have **one JREAL VISION website**.

But internally:

Your staff sees everything in **one admin dashboard**.

How customers actually enter your website

Don't rely only on people typing your website address.

You need different acquisition channels.

B2C

Instagram
TikTok
Facebook
Google
WhatsApp
Referrals

↓

Shop

B2B

Google searches:

Printing company Kigali
Branding company Rwanda
Business cards Kigali
T-shirt printing Rwanda
Digital marketing Kigali

LinkedIn
Instagram
Direct sales
WhatsApp

↓

Business Solutions

NGO

Google
LinkedIn
NGO networks
Direct email outreach
Procurement opportunities
Referrals
Partnerships

↓

NGO & Organization Solutions

One very powerful feature

Put this button everywhere:

REQUEST A QUOTE

Because not every project can have a fixed price.

For example:

Shop product → Add to Cart

but:

5000 brochures → Request Quote

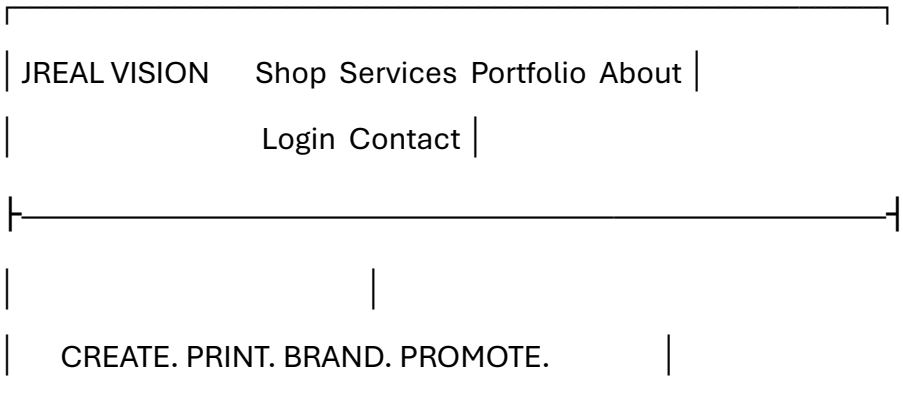

NGO campaign → Request Quote

Corporate video → Request Quote

Office branding → Request Quote

Monthly digital marketing → Request Quote

Your homepage could look like this

Design, printing, branding, media & marketing solutions for individuals and organizations.

[SHOP NOW] [REQUEST A QUOTE]

WHAT DO YOU NEED?

🛍️ Personal 🏢 Business 🤝 NGO

Shop products Grow your business Projects, campaigns & events

OUR SERVICES

Design | Printing | Branding | Marketing

Photography | Videography

FEATURED PRODUCTS

[T-Shirt] [Business Card] [Banner] [Mug]

The business model becomes very strong

You aren't building **just an e-commerce website**.

You're building a **digital sales platform for JREAL VISION**:

B2C → products

B2B → business projects

B2NGO → organizational projects/RFQs

And all three eventually enter your **JREAL VISION CRM/order system**, where you can manage quotations, negotiation, payments, production, delivery and customer communication..
